

SERVICIO NACIONAL DE APRENDIZAJE SENA

Centro: Centro de Diseño e Innovación Tecnológica Industrial

Ficha: 3235906

Programa de Formación: TECNOLOGÍA EN ANÁLISIS Y DESARROLLO DE SOFTWARE

Nombre del Aprendiz: Laura Barona Saavedra

Nombre del Instructor: Eliana Cardona

Fecha: 13 de junio 2026

My name is Laura Barona Saavedra, and I am a Software Developer specialized in backend development with Java, Spring Boot, microservices, and Hexagonal Architecture. I am passionate about creating scalable, secure, and efficient software solutions that help organizations improve their processes and achieve their business goals. Throughout my academic and professional journey, I have developed both technical and interpersonal skills that allow me to contribute effectively to software development teams.

Currently, I work as a Backend Software Developer in a technology company where I design, develop, and maintain microservices-based applications. My responsibilities include implementing REST APIs, integrating databases, ensuring software quality through testing, and collaborating with multidisciplinary teams to deliver high-quality solutions. I enjoy solving complex problems and continuously learning about new technologies and development methodologies.

One of my greatest strengths is my ability to learn quickly and adapt to technological changes. The software industry evolves constantly, and I consider continuous learning an essential part of my professional growth. During my training program, I have strengthened important competencies such as time management, teamwork, problem-solving, communication skills, and computer proficiency. These skills have allowed me to work efficiently under pressure while maintaining high standards of quality.

In addition, I have gained valuable experience working with software development tools and methodologies, including Git, Agile practices, databases, cloud technologies, and software architecture patterns. My technical background has enabled me to understand the complete software development lifecycle and contribute to projects from analysis and design to implementation and maintenance.

I believe I am an excellent fit for this professional position because I combine strong technical knowledge with commitment, responsibility, and a proactive attitude. I am highly motivated to create innovative solutions and contribute positively to every project in which I participate. Furthermore, I value teamwork and understand the importance of collaboration in achieving successful outcomes.

My future goals include becoming a Software Architect and leading large-scale technology projects. I aspire to continue expanding my expertise in cloud computing, distributed systems, and software architecture. I also aim to mentor junior developers and contribute to the growth of development teams by sharing knowledge and best practices.

Technology has the power to transform businesses and improve people's lives, and I am excited to be part of this transformation. Through dedication, continuous improvement, and a passion for innovation, I am confident that I will continue growing professionally and making meaningful contributions to the software industry.

In conclusion, I am a committed software developer with strong technical and personal skills, valuable experience in backend development, and clear professional goals. I am eager to continue learning, facing new challenges, and contributing to the success of innovative technology projects in the future.
